PROJECT: "Halo-T 400 Analysis; Lot 9884"

RTP Labs ID: 07-020

Presented below are the laboratory results of the analysis for the sample received on February 1, 2007. One bottle labeled "**Halo-T 400**"; Lot 9884, containing 60 capsules was received in good condition. Ten capsules were individually weighed and combined to obtain a representative sample. The average weight of the capsules was 0.2134 grams. A ten-milligram portion of the capsules was extracted and analyzed by GC/MS for the substances listed and compared against a reference standard of a similar pure compound.
