## PROJECT: "Methyl Stak Analysis"

### RTP Labs ID: 07-067-2

Presented below are the laboratory results of the analysis for the sample received on April 19, 2007. One bottle labeled "Methyl Stak"; Lot 1339, containing 60 capsules was received in good condition. Ten capsules of each sample were individually weighed and combined to obtain a representative sample. The average weight of the "Methyl Stak" capsules was 0.3465 grams. A ten-milligram portion of the capsules was extracted and analyzed by GC/MS for the substances listed and compared against a reference standard of Testosterone. Analytical reference standards of the listed substances could not be obtained; therefore the exact identification of the compounds cannot be confirmed.

## Certificate of Analysis

<i>Product Name</i>	<i>Lot</i>	<i>Expiration</i>	<i>Substance Tested</i>	<i>Results mg/cap</i>	<i>Label mg/cap</i>
Methyl Stak	1339	04/09	17 $\alpha$ -methyl-1,4- androstadiene-3,17-diol <i>Purity: 99+%</i>	35.6	30.0
			Estra-4,9-diene-3,17-dione <i>Purity: 99+%</i>	28.6	25.0

Please call me if you have any questions,

Sincerely,

Alston Sykes, Principal Chemist
